PLASTICPARTSMEDICAL

Medical & Healthcare injection moulding

- ISO Class 7 Clean Room Facility
- Full Validation and Qualification Service
- Design, prototyping, tool making and production facilities
- Certified ISO 13485 for the manufacture of medical devices (Pending)

Plastic Parts Medical specialise in the development and manufacture of medical and healthcare products. Working with OEM's and design agencies we take ideas and fully designed and specified parts right through from prototype to tool making and then on to validation and qualification before full volume production takes place – all under one roof.
